JOSHI STUDY MATTER (C)

- Anthracinum holds so much grief deep inside that it can be seen as a remedy with the most silent grief, with the most serious emotional injury which also remains deep inside. It is as if all emotional and mental traumas of Anthr. have been encapsulated in a huge dark tumour " [Vithoulikas]
- Traumatism

- "One difference with Nat-m. is that Anthr. does not seem to be conscious of the trauma. It is as if he accepts it and thinks that it is inherent to his existence. He will never discuss it with anybody."

[Vithoukias]

- can be hard on themselves [self-reproach], and need to be in control."
